

5-Day Mafia Island Beach Holiday

Visited countries

Tanzania

Tanzania is surely one of the world's great safari destinations. Blessed with abundant and varied wildlife, hundreds of bird species and a plethora of stunning landscapes, Tanzania is a mecca for those seeking a real African experience. Here, you will find the unforgettable Mount Kilimanjaro, the world's tallest free-standing mountain, the timeless Serengeti, its acacia-dotted plains evoking images of the classic safari experience, and Zanzibar, whose perfectly white beaches and turquoise seas are like something from a dream. Tanzania is also home to the colorful Maasai people, who for many represent Africa itself, and to one of Africa's last functioning hunter-gathered tribes, the Hadzabe. This means that the natural richness of the country is complemented by a cultural one. Visitors will find Tanzania a welcoming, safe, and fascinating place to spend time.

Visited places

Mafia Island

Mafia Island is the largest of a small archipelago of islands and atolls and is truly a paradise in the Indian Ocean.

Mafia Island is known as a beautiful Indian Ocean tropical resort that is famous for deep sea fishing and scuba diving. Aquatic life is abundant and the coral gardens are pristine due to the protection of the Mafia Island Marine Park, the largest marine park in East Africa. The park is located between the Rufiji River delta to the west and the open Indian Ocean to the east. The dual influences of the river and the sea have combined to create a rich and exceptional biodiversity with unique landscapes under the sea and on dry land. It is a unique and perfect destination as part of a safari package or simply a place to unwind and get away from the daily, modern and busy world. Mafia Island is especially good for active people ... divers, sailors and walkers ... looking for somewhere off the beaten track.
